# WHAT IS TRANSPARENT RESOURCE PORTFOLIO MANAGEMENT SYSTEM?

Project success is critical to bottom-line profitability, yet many businesses struggle with projects running behind schedule or over budget. Project scope needs to be managed constantly with variations identified immediately. Transparent Resource Portfolio Management System is a comprehensive solution for project managers who plan and execute simple or complex projects that can require intricate multilevel phases as well as strict costing and complex billing.

Embedded within the robust capabilities of the system, Project Management utilizes the detailed estimation, planning, scheduling, costing, and supply chain logistics of the system for complete control and analysis of any project. Resource Management provides a detailed representation of resource capabilities and availability. Time, Expense Management and Approval ensure projects accurately reflect true costs and the comprehensive Billing and Revenue Recognition functionality guarantee compliance with contract requirements and accounting standards.

At all times, throughout the whole process, embedded Project Analysis and Reporting combined with Business Process Management provides accurate and up-to-date status information and meaningful alerts.

To be successful in a project environment, project management must permeate every aspect of your business solution. Companies that are able to efficiently meet the demands of managing their portfolio of projects have a distinct advantage over their competitors; they have a better understanding of their costs so they can bid with confidence.

# WHAT DO WE HELP?

## FOR PROJECT MANAGERS

With Transparent Resource Portfolio Management System, projects are centralized and tasks are distributed to each team member effectively. Our system empowers team members to update their own tasks, allowing project managers to do the job they were hired to do, providing leadership and oversight on projects.

- Team members are empowered to update their own tasks
- Project managers have more time to manage projects, instead of administering them
- Everyone knows where projects stand in real-time
- Free project managers from endless phone calls about the schedule from other levels.

## FOR PROJECT EXECUTIVES

What challenges do Project Executives always face? It is over budget, or behind schedule. This means profitability of the project was reduced.

Our system provides insight into all projects in real-time, letting Executives & Steering Committee know if a project is on track or in danger of getting behind schedule.

- Executives have access to the data for making informed decisions
- Portfolio budgetary figures are available, which automatically calculates planned versus actual, planned versus earned value, portfolio recovery cost
- Executives save valuable time because of ease of gathering information in one system

## FOR PROJECT TEAM MEMBERS

You are Project Team members? Do you not know what project tasks that you need do?

Our system is great for centralizing all projects in one place. Team member tasks are automatically distributed to team members' portals. Task Management function provides team members with one list of the projects and tasks that they should be working on. This function also provides them one place to easy update percentage completed and actual hours recorded.

- Team members' tasks are automatically distributed to their Portals
- Team members may sort tasks by Start or End date
- Project Priority or Project Progress is reflected in 'Traffic light' Indicators displaying urgency of the project
